

Publications

The IEEE Robotics and Automation Society (RAS) is committed to advancing innovation, knowledge, and excellence in robotics and automation. Our publications serve as a global platform for researchers, engineers, and practitioners to share groundbreaking ideas, cutting-edge technologies, and practical applications that shape the future of intelligent systems.
Find essential resources and guidelines related to our journals, magazines, and submission processes, both RAS Sponsored Publications, Co-sponsored Publications and Technically Co-sponsored Publications. Whether you are preparing a manuscript, submitting a video, or exploring ethical standards, these links provide everything you need to contribute to and benefit from the RAS community.

ASE Paper at IEEE RAS Conferences

sactions on Automation Science and Engineering (T-ASE) regular paper
rvey papers, or communication items) are given the opportunity to
ne upcoming conference of the IEEE Robotics and Automation Society
sented at one of the following conferences, a paper must be submitted
time windows below, which close at least a month before the Steering
the conference:

ICRA 2027
May 24 – 28, 2027

IROS 2027
September 26 – October 1, 2027

CASE 2027
August 23 - 27, 2027

For a paper to be considered eligible, it must have been accepted by T-ASE within 270 days prior to the conference submission deadline and may only be presented at one of the conferences listed above.

Please note that the eligible paper must be submitted to PaperCept and authors may not request any acceleration or delay of the review process based on these time windows. For a submission code, please contact T-ASE EIC.

Editorial Board

Automation plays an increasingly important role in the global economy and in our daily lives. Automation is changing manufacturing as well as healthcare, security, and energy. The IEEE Transactions on Automation Science and Engineering (T-ASE) publishes new abstractions, algorithms, theory, methodologies, models, systems, and case studies that can be applied across industries to significantly advance efficiency, quality, productivity, and reliability for society.

T-ASE is published quarterly since July 2004. T-ASE and its sibling publication, the IEEE Transactions on Robotics (T-RO) are published by the Institute of Electrical and Electronics Engineers and edited by the IEEE Robotics and Automation Society.

As of 2025, the T–ASE Impact Factor is 7.9. The T–ASE acceptance rate is around 29%. The average time from paper submission to first decision is under 3 months and the average time from submission to publication online is under 9 months. Submissions have grown steadily from under 400 in 2011 to over 4300 in 2025.

All inquiries about submissions and papers under review should be directed to Rebecca Hytowitz (Editorial Assistant) or ieee.tase.eic@gmail.com.

Joining the T-ASE Editorial Board

T-ASE is now accepting nominations for new Editors and Associate Editors. Fill out this form to nominate an Editor or an AE. The deadline for submission is 1 October 2026. You may also contact Rebecca Hytowitz (Editorial Assistant).
